

Mosgarage Dev Fabric

A self-healing, AI-powered, cloud-native developer platform for WSL2, Linux, VPS, and hybrid environments.

Overview

Mosgarage Dev Fabric is a complete development platform built around Docker, Code Server, AI tooling, GitOps, CI/CD, remote synchronization, and infrastructure automation.

Designed to run identically on:

- WSL2
 - Ubuntu
 - Debian
 - VPS
 - Cloud Virtual Machines
 - Bare Metal Servers
-

Features

Development

- VS Code Server
- Docker Engine
- Docker Compose
- Git
- GitHub CLI
- SSH Development
- Dev Containers

AI

- Claude Code
- OpenAI Integration
- Ollama
- Local LLM Support
- AI Agent Framework

Databases

- PostgreSQL
- Redis
- SQLite
- MinIO Object Storage

Infrastructure

- Nginx
- Cloudflare Tunnel
- Tailscale
- Reverse Proxy
- SSL Automation

Automation

- GitOps
- GitHub Actions Runner
- Automated Backups
- Auto Updates
- Auto Recovery

Monitoring

- Health Checks
 - Service Watchdog
 - Resource Monitoring
 - Alerting
-

Architecture

Internet | |—— Cloudflare | |—— VPS Cluster | |—— Local WSL2 | |—— Code Server |——
Docker |—— PostgreSQL |—— Redis |—— Ollama |—— AI Agents

Quick Start

Clone Repository

```
git clone https://github.com/mosgarage/mosgarage-dev-fabric.git
```

```
cd mosgarage-dev-fabric
```

Install

```
curl -fsSL https://raw.githubusercontent.com/mosgarage/mosgarage-dev-fabric/main/install.sh | bash
```

Services

Service	Port
Code Server	8443
PostgreSQL	5432
Redis	6379
Ollama	11434
MinIO	9000
Nginx	80
HTTPS	443

Auto Sync

Git repositories automatically synchronize every five minutes.

Remote VPS synchronization uses rsync and SSH.

Backups

Automatic backups:

- Databases
- Configuration
- Docker Volumes
- Project Workspaces

Retention:

- Daily
 - Weekly
 - Monthly
-

Security

- SSH Keys
- Tailscale Mesh
- Cloudflare Protection
- Secrets Management
- Least Privilege Design

Disaster Recovery

Rebuild complete environment using:

```
./install.sh
```

No manual intervention required.

Roadmap

v10 Atlas

- Claude Code
- Ollama
- PostgreSQL
- Redis
- MinIO
- GitOps

v11 Horizon

- Kubernetes Support
- Multi-node Clusters
- Agent Orchestration

v12 Nexus

- Distributed Build Grid
 - Autonomous Deployment Engine
 - AI Operations Center
-
